OBJECTIVE

Full-Stack Developer with a strong foundation in **Python**, **C++** , **React**, **Express js**. Seeking to leverage hands-on project experience in building responsive **User Interfaces** and **RESTful APIs** to contribute to innovative technical solutions.

TECHNICAL SKILLS

- **Frontend: React.js**, HTML5-CSS3, Javascript.
- **GenAI**: Python, Langchain, PyTorch, Open AI.
- **DevOps & Cloud:** Docker, **AWS(EC2/S3)**, Vercel, Git.
- **Backend: Python**, C++, **Node.js**, Django, Flask, Fast API.
- **Databases**: MySQL, Microsoft SQL Server.

PROJECTS AND EXPERIENCE

StaxTech [Sep 2025 – Nov 2025]

As a **Full Stack Developer** I was the part of the team that developed **web applications** using **Python (Django/Flask), Node.js** and **frontend technologies (React/JS, HTML/CSS),** optimized performance and collaborated on **database design**.
My Responsibilities include building **RESTful APIs**, debugging, implementing user features, and using **Git for version control** to deliver functional, scalable software solutions.

Library Management System Project — Govt univ's library automation project Sep 2025 – Nov 2025

- **Modular Backend Architecture**: Developed a scalable **Django application** using a multi-app architecture (**adminapp, studentapp, lmsapp**)
- to decouple administrative logic from student-facing features**.**
- **Database Management:** Designed and managed a relational database using **SQLite**, creating efficient models for users, course content,
- and registration workflows.
- **RESTful Routing**: Implemented custom URL routing patterns across multiple sub-apps to manage complex navigation and data flow between
- different user roles.
- **Live:** https://github.com/MazharHusain/LMS

SMARTCART — Ecommerce website with admin access, Integ digital payment access Oct 2025 – Nov 2025

- **Full-Cycle E-commerce Logic**: Engineered a comprehensive shopping experience including product **catalogs**, a dynamic "**AuthCart"** system for cart management, and a streamlined checkout workflow.
- **Payment Gateway Integration**: Integrated **PayTM API** to facilitate secure, real-time financial transactions and automated payment status updates.
- **Live:** https://github.com/MazharHusain/SMARTCART-ECOM

DPI Engine & Packet-Analyzer — A high speed network analysis tool. Dec 2025 – Jan 2026

- **C++, Multi-threading, PCAP, CMake Engineered** a high-speed network traffic analysis tool capable of Deep Packet Inspection (DPI), protocol parsing, and real-time connection tracking
- Engineered a high-speed network traffic analysis tool capable of **Deep Packet Inspection (DPI)**, protocol parsing, and real-time connection tracking. **Backend** acts as a **intelligence hub** processing user requests, communicating with AI models.
- Built a custom **Packet Parser** and **SNI Extractor** to decode complex network headers and extract metadata from **encrypted handshakes (SSL/TLS).**
- **Live**: https://github.com/MazharHusain/Deep-Packet-Inspection

Medi-CHATBOT — AI Powered Medical Enquiry System Jan 2026 –Feb 2026

- Developed an end-to-end medical chatbot leveraging **Large Language Models (LLMs**) and **Vector Databases** to provide accurate information based on indexed medical literature.
- **RAG Pipeline Implementation**: Architected a Retrieval-Augmented Generation **(RAG**) system using **LangChain** to extract and process data from medical PDF documents.
- **Live**: https://github.com/MazharHusain/Medical-Chatbot

EDUCATION

Bachelor of Technology — Computer Science & Engineering with AIML 2020 – 2024

College- KMC University, Lucknow .

.

CERTIFICATIONS

- **LearnX Learning** — Learning Python Development Course.
- **C++ Academy** — C++ fundamentals.
- **Amazon Aws** — Learning AWS fundamentals.
